SUMMARY

Senior Software Engineer with 8+ years building scalable SaaS platforms and leading engineering teams. Experienced in recruitment tech (ATS, talent sourcing) and enterprise SaaS systems. Strong backend architecture, API design, and PostgreSQL expertise.

KEY SKILLS

- **Backend:** Python, FastAPI, REST APIs, GOLANG , GRPC
 - **Frontend:** Next.js, TypeScript, VueJS
 - **Database & Search:** PostgreSQL, pgvector, Semantic Search, Embeddings
 - **AI / LLM:** OpenAI APIs, LLM Integration
 - **Enterprise Systems:** ERPNext, Frappe
 - **Infrastructure:** Docker, Kubernetes, Google Cloud, CI/CD, Linux
-

PROFESSIONAL EXPERIENCE

Technical Lead

Mawhub — AI Recruitment & Talent Sourcing Platform

Saudi | 2025– Present

Led the engineering development of a **recruitment technology platform focused on candidate sourcing and hiring workflows**, including the development of an **Applicant Tracking System (ATS)** and tools used by recruiters to manage candidate pipelines.

Key Contributions

- Built and led backend architecture for **ATS and candidate sourcing platform**.
- Designed scalable PostgreSQL models and high-performance APIs for recruiter dashboards.
- Mentored engineers and coordinated system-wide architecture decisions.

Senior Software Engineer / Technical Lead

ABC Hotels — Yalabina Platform

Led the architecture and development of **Yalabina**, a reservation platform similar to Booking.com and Airbnb.

Key Contributions

- Designed and built **Yalabina reservation platform** backend (Golang) and APIs.
 - Led development of backoffice and customer-facing applications.
 - Integrated external services and managed deployment pipelines.
-

Full Stack Developer

Business Pro, Remote (KSA)

2018 – 2022

- Built **Alshab Alriyadi**, a platform connecting entrepreneurs and investors (5,000+ MAUs).
 - Developed scalable **Node.js/PostgreSQL microservices**, improving response times by
-

Projects

TAL Sourcing Platform

Candidate sourcing platform designed to help recruiters discover, manage, and evaluate talent from multiple sources.

- Designed backend services for candidate aggregation, profile management, and recruiter workflows
 - Implemented advanced search and filtering capabilities for candidate discovery
 - Built scalable APIs used by recruiter dashboards and internal tools
 - Optimized database structures for handling large candidate datasets
-

TAL ATS (Applicant Tracking System)

Recruitment management system built on **ERPNext / Frappe** to manage the full hiring lifecycle.

- Designed and developed core ATS modules including job postings, candidate pipelines, interview workflows, and hiring stages
 - Extended **ERPNext** with custom recruitment modules and integrations
 - Built APIs and services used by internal recruitment tools and dashboards
 - Implemented workflow automation to streamline recruiter operations
-

ABC Hospitality Management System

Enterprise hospitality management platform built on **ERPNext** to support hotel and property operations.

- Implemented ERP-based modules for reservations, operations, and business workflows
 - Customized **ERPNext** to support hospitality-specific processes
 - Integrated backend services and APIs with external systems
 - Designed scalable database structures to support operational reporting and management tools
-
